

1.

$$\cdot n/2 \rightarrow n \quad O(n)$$

$$\cdot j + n/2 \leq n \rightarrow O(n) \\ O(\log n)$$

$$\cdot O(n) \cdot O(n) \cdot O(\log n) = O(n^2 \log n)$$

2. - Inner loop solo itera una vez $O(1)$

- $O(n)$ del loop que encierra todo

$$(O(1 \cdot n)) = O(n)$$

$$3. \quad i=1; \quad i \leq n/3; \rightarrow O(n)$$

$$j \leq n \rightarrow O(n)$$

$$O(n) \cdot O(n) = O(n^2)$$
